Spring 2017
Instructor: Ron Mak

Assignment #2

Assigned: Tuesday, February 14
Due: Monday, February 20 at 11:59 pm
Team assignment, 100 points max

Source code repository

The purpose of this assignment is for each team to create a source code repository on GitHub or other similar service.

- Each student creates an account on GitHub with a user name.
- One member of each project team creates a repository and invites the other team members to be collaborators using their GitHub user names.
- If the account is public, submit the name of the repository.
- If the account is private, invite users **ProfMak** and **cmpe131spring2017** (ISA Melvin Ch'ng) to be (silent) collaborators.
- If the account is not on Github, include instructions on how Prof. Mak and Mr. Ch'ng can monitor your team's work during the semester.

Prof. Mak and Mr. Ch'ng will monitor the repository statistics to help ensure that all team members contribute to their projects.

Each team member should learn how to use GitHub. If you rely on another team member to push your code into the repository, your work won't appear in the statistics.

What to submit to Canvas

A text entry (one per team) containing the above information:
Assignment #2. Source code repository.
