OUR VISION

Kanvas, with a K is a platform that offer an online collaborative environment for students to work on project and assignment without the need to meet each other face to face. It also offers a tracking system that auto notify upcoming assignments and self-generate a scheduler that delegates tasks and comes up with deadline. Kanvas, with a K is a platform that allows for multiple users to edit and work on the same assignment in real-time and communicate with one another through instant messaging.

ABOUT OUR APP

Kanvas, with a K is programmed using the framework of Ruby on Rails. The application is created to help connect students and provide an innovative platform for students to work on their assignments together. Kanvas, with a K is also created to help students manage their work load better through efficient planning.

"

IF EVERYONE IS MOVING FORWARD TOGETHER, THEN SUCCESS TAKES CARE OF ITSELF.

"

Henry Ford

FEATURES

CONNECT

The connect feature allows users to add classmates and find tutors.

ASK

The ask feature provides a foundation for communications between group members acting as a forum for questions and in-depth discussion.

SHARE

The share feature allows students to upload important files and class notes to other classmates.

ORGANIZE

The organize feature allows students to have a calendar to keep track of due dates, tests, and personal events.

COLLABORATE

The collaborate feature allows students to edit documents in real-time and work as a group.
