

Level Up!

Site Navigation

Once on the website,

- Users will be able to view a list of top rated games on the homepage.
- When hovering over the games, a pop-up of a short description of the game will appear along with a real-time live play of the game on Twitch.
- Trailer videos will be played if there are no players streaming the game from Twitch.
- Users will be able to access current game reviews and ratings while discussion gaming strategies with our comment/chat forum features.
- An interactive Emoji section will enhance the experience of users communicating with other players.

Who We Are

About Us

Enrolled in CMPE 131 this Spring 2017 semester, our main achievement is to create a web application allowing users to view game reviews and ratings of the most popular games out on the market.

Our job is to make sure we are providing all the necessary games users want while implementing never before seen features on our web application.

Gamers

Final Fantasy XV

Pokémon Sun

Fire Emblem Heroes

POWER PLAY

*A site to meet all your gaming
wants and needs!*

Tales of Berseria

Nioh

The Witcher 3: Wild Hunt

Current Mission

As technology is increasingly useful in our world today, a variety of games are now out on the market. Our web application will ensure users have the ease of going to one website to search for their wanted game to fulfill their needs of game ratings and reviews.

“Once a gamer, always a gamer.” –Sandy Trinh

Crash Bandicoot N. Sane Trilogy

“Check your sodium levels before playing.” – Andy Park

Mario Party 10

The Elder Scrolls V: Skyrim

Dark Souls III

Mission Accomplished

Long-Term Goal and Features

The goal of this web application will be to allow users to access new/recent games all on one website.

They will be able to read the description of the games and view user rating to determine whether or not they want to purchase the game.

This web application will be different from others as we will incorporate new features such as a Twitch stream for viewers who want to see how the game is played in real-time.
