Here at EzExam, we put convenience first.
Problem

- A professor has to create and grade exams for a huge capacity of students
  - Very tedious
  - Often takes longer than expected
- Students have to wait for grades and answer sheets to come out
  - We would like to just get it over with

Solution: Our online examination application can reduce extra work and provide a better platform for conducting exams
What is EzExam?

Integrated online examination system that:

- Reduces paperwork
- Efficient, convenient and less stressful
- Time saver
- Assess students by conducting online objective exams
- Allow professors to create exams easily
- Can help both professors and students improve their examination experience
Product Objective

- EzExam was designed to change the conventional process of conducting and taking a test.
- Designed to facilitate user and administrator through a fully automatic system.
