Title:
Junior Web Developer

Description:
Help define the next generation of web applications. Design, deploy, and manage shopping carts, content management systems, and custom web applications through exceptional web development. Extend open source or commercial web applications to repackaging as products. Work closely with clients to update their sites accordingly, train them, and answer any questions. Become the sharpest ‘tool’ in our shop for PHP and AJAX web applications through learning and innovating new ways of developing. Gain knowledge and utilize the XHTML 1.1, CSS 2.0, SOAP, and other cutting edge standards and technologies.

Requirements:
Have in depth knowledge of a general purpose programming language like C, C++, C#, or Java with the desire to master, or already know PHP. Knowledge of SQL, XHTML technologies, and Server (Windows 2003/Linux) development and maintenance, is not required, but is recommended. Good verbal and written communication skills are a must along with the desire to work closely with clients. Eager to be a part of a high performance web development team.

About Activo Inc:
Activo is a full-service web solution provider – leader in open source and commercial content management systems, ecommerce platforms, and web applications.
